Data Loss Protection for Your Business

Can your business afford to lose all of your business data?

There are numerous ways to lose it - from accidental deletion to viruses and hackers' attack. According to Accenture reports, in 2018 the average cost of a malware attack on a company was $2.4 million.

So, is your company data protected enough?

Blue Lightning IT Services will securely back up all your files, including documents, emails, and applications

Here's how backup by Blue Lightning IT Services will help you protect your business data

- Fast data recovery available 24/7
